The premier network of corporate safety and health leaders for nearly 40 years

The Occupational Safety and Health (OSH) Group is led by Mercer ORC Networks, an acknowledged business leader on safety and health issues with nearly 40 years of experience in the field. Always in the forefront of developing new business approaches to advance safety and health, Mercer ORC Networks' OSH Group is a key industry voice on national and global safety and health policy issues whose nationally known consultants possess unmatched expertise.

Nowhere else can you find:

- A network of senior corporate occupational safety and health leaders
- 100 leading global corporations in more than 20 industry sectors
- All members dedicated to achieving safety and health excellence
- Candid benchmarking and sharing of best practices
- New strategies and tools to improve safety and health performance

Member benefits

- Quarterly meetings that provide members with opportunities for intensive networking and information-sharing with their peers, for exchanging views with representatives of regulatory agencies, and for interacting with invited occupational safety and health and business experts
- Unlimited immediate telephone and electronic access to Mercer ORC Networks consultants on any issue, and one annual on-site consultant visit
- Exchanging and comparing safety and health performance data annually and participating in frequent surveys of member company practices on topics such as management systems, security, metrics and organizational structures
- Advocacy of business positions on regulatory and enforcement issues and a link between member companies and government agencies
- A members-only website and frequent e-mail alerts that provide timely updates and links to new developments as well as past meeting materials

Current taskforces and projects

- Member-initiated Occupational Illness Task Force that benchmarks on member company occupational illness experience, including surveillance, management and prevention of work-related illnesses
- Combustible Dust Task Force, dedicated to shaping the new combustible dust standard through their multiple industry perspectives
- Newly formed Motor Vehicle Safety Task Force, which collaborates with multiple government agencies to address these issues
- Task force dedicated to developing strategies toward prevention of work-related fatalities and serious injuries
- Collaboration with NIOSH on various research topics, including transportation contractor safety and prevention through design
